

Scania - DS11 200hp Marine Diesel Engine Package

£ 5,995

Description

Scania DN11 210hp Six Cylinder Naturally Aspirated 11 Litre Heat Exchanger Cooled Marine Diesel Engine Fitted With Twin Disc 2:1 Hydraulic Gearbox This engine has been removed in good running order as part of a fleet engine standardisation within a small ferry operating company where all engines are being changed over to the same make and model for ease of spares and maintenance. This Scania was recently inspected and passed as part of the boats classification survey with good compression readings which were verified by Scania. This would make an ideal auxilliary or main engine for a barge or workboat offering a lot of power at very low revs. Shipping can be arranged anywhere in the UK or Worldwide at buyers cost. Please call 07809 524834 for further information.
