

**MerCruiser - MerCruiser 3.0 LX 135hp Petrol  
Sterndrive Engine (Pair Available)**

£ 3,750

**Description**

MerCruiser 3.0 LX 135hp Four Cylinder Petrol Marine Engine Setup For Alpha 1 Gen 2 Sterndrive, Complete With Wiring Harness & Instrumentation These engines are TKS models with auto prime, auto choke and digital distributor unit. We have a matched pair of these units available so we also have the twin lever controls, control cables and power steering system which will be included if purchasing as a pair, as well as a steering indicator system and trim dials. These engines were with the same owner from new, the boat being part of a private collection and only 251 hrs showing on the hour counter which we are advised is genuine so only a handful of hours each year. The former owner apparently owned six different boats, all of which were dry stored when not being used. Both engines start instantly and ran well on sea trial prior to removal at the end of the 2021 season. We have run them briefly in our workshop this spring and again, both engines started and ran well. The Alpha 1 Gen 2 sterndrives are available at extra cost and are in clean condition with no apparent damage or issues and the drives are fitted with stainless steel propellers which are included. The transom shield assemblies are complete with trim rams but have corrosion damage to the main outer casings around the main steering pins and will require replacement outer casings if they are to be used again. We also have a selection of alternative used Alpha 1 Gen 2 sterndrive shield assemblies in stock. Engines available for £3750 VAT per unit. Sterndrives for £1500 VAT per unit to include the original Transom Shields in need of repair. With complete packages we will also include trim pumps, steering tie bar, power steering ram etc. Shipping can be arranged anywhere in the UK or Worldwide at buyers cost. Please call our office on 01935 83876 for further information.
